

Mouli Kishore Chatterjee
[18-01-1938 to 04-05-2025]

It is with a heavy heart that we inform the passing of renowned bridge engineer, **Sri Mouli Kishore Chatterjee**, on **4th May 2025**, following an illness.

Sri Chatterjee earned his Bachelor of Engineering and Master of Engineering degrees in Civil Engineering in 1960 and 1964, respectively, from the then Bengal Engineering College, now known as IEST, Shibpur.

He began his professional career with the Ministry of Surface Transport (MoST) now known as Ministry of Road Transport and Highways (MoRTH), later joining STUP Consultants P. Ltd., where he worked until 1988. Afterward, he continued as a freelance bridge expert. He was involved in numerous bridge projects across India and abroad.

With his passing, the bridge engineering fraternity has lost one of its tallest pillars. A rare combination of brilliance, discipline, and unwavering integrity, **Mr. Chatterjee** was much more than an exceptional engineer—he was a mentor, a guide, and a true *guru* to many.

Gentle yet firm in his pursuit of perfection, Mr. Chatterjee inspired generations of engineers not only to excel in their technical endeavours but also to uphold the highest standards of integrity. His influence extended far beyond engineering—shaping character, professionalism, and values.

His legacy will live on—not just in the bridges and structures he helped design, but in the hearts and minds of those he mentored and inspired throughout his remarkable journey.

He is survived by his son **Sambodhi**, daughter **Shaminee**, and their families, who are settled in the **USA**. His wife passed away a few years ago.

GAABESU joins the bereaved family in praying for his noble soul to rest in peace and for the family to find the strength and courage to bear this irreparable loss.
